

The Quest for Right, Volume 3 (Hardback)

By C David Parsons

Tate Publishing Enterprises, United States, 2008. Hardback. Book Condition: New. 257 x 208 mm. Language: English . Brand New Book ***** Print on Demand *****.The four major hypotheses expounding the origin of the moon are subjected to the absolutes of classical physics. In conjunction, the causation of twice-daily tides is on the agenda. While the premise may be stated in a matter-of-fact manner, the inquiry promises to be a white water adventure for those who wish to ride along with the investigation. On the agenda are: volcanism, pressure solids, differentiation of the moon/earth distances, the causation of high and low tides, and the crossover of perigees. Never heard of the crossover of perigees? Don't miss this remarkable chapter. The untouched character of the moon's surface will come as a surprise to the many that have been swayed by erroneous reports attributing the topographical features of the moon to impacting meteorites. A familiar adage is applicable: NASA scientists could not see the forest for the trees. The investigation deals with the mysterious cavities and the intrinsically associated domical bulges and dome excavations distributed across the near side of the moon. The sequence of events responsible for the sensible features...
