A line drawn along the western border of the state would be 225 miles long. A straight line drawn across the state on its southern border would be about 325 miles long, while the width on the northern border from the Mississippi river to the Texas line is only 160 miles. The longest straight line that could be drawn in Louisiana would lie between the mouth of the Mississippi river and the northwestern corner of the state. Describe the general shape of the state. The United States is divided into three great districts; namely, the Atlantic slope which is east of the Appalachian Mountains; the Pacific slope lying west of the Rocky Mountain divide; and the great basin of the Mississippi. This immense basin contains two-thirds of the area of the United States. Likewise, from the standpoint of foreign trade, there are three centres; namely, New York, San Francisco, and New Orleans. Thus nature has made tributary to Louisiana the most fertile valley in the world united by a great river and its tributaries. What are they ?
