

Cabbage

By Frederic P. Miller

Alphascript Publishing Dez 2009, 2009. Taschenbuch. Book Condition: Neu. 220x150x7 mm. Neuware - High Quality Content by WIKIPEDIA articles! The cabbage is a popular cultivar of the species *Brassica oleracea* Linne (Capitata Group) of the Family Brassicaceae (or Cruciferae), and is used as a leafy green vegetable. It is a herbaceous, biennial, dicotyledonous flowering plant distinguished by a short stem upon which is crowded a mass of leaves, usually green but in some varieties red or purplish, which while immature form a characteristic compact, globular cluster (cabbagehead). The plant is also called head cabbage or heading cabbage, and in Scotland a bowkail, from its rounded shape. The Scots call its stalk a castock, and the English call its head a loaf. It is in the same genus as the turnip *Brassica rapa* L. Cabbage leaves often display a delicate, powdery, waxy coating called bloom. The sharp or bitter taste sometimes present in cabbage is due to glucosinolate(s). Cabbages are also a good source of riboflavin. 124 pp. Englisch.
